SUMMARY

BSSE student and freelance UI/UX designer seeking an App Developer to build hands-on experience in mobile application development. Brings a working foundation in Flutter/Dart and Android Studio, one year of full-stack web development practice (React, Node.js), and over five years of professional design experience — looking to apply that design and programming background to real mobile projects under professional mentorship

EXPERIENCE

Flutter App Developer

Self-Employed

- 2025 - Present
- Developing responsive websites and web applications for individual and small-business clients using HTML, CSS, JavaScript, React, and Node.js
- Developed cross-platform applications using Flutter and Dart for Android, iOS, Web, Windows, and macOS.
- Built responsive and user-friendly interfaces using reusable Flutter widgets.
- Implemented application functionality using models, providers, services, and modular architecture.
- Integrated Firebase for authentication and backend services.
- Developed and maintained applications from UI implementation to testing and debugging.
- Troubleshoot Flutter, Dart, Gradle, and Firebase integration issues.

EDUCATION

BSSE

UET Taxila

2023 - Present

Intermediate (ICS)

Global Higher Secondary School

2020 - 2022 Faisalabad

SKILLS

Dev

Flutter	Dart	Android Studio	
Firebase	HTML	CSS	JS
REACT	Node.js	REST APIs	

Design

Figma	Adobe XD	Photoshop
Illustrator	UI/UX Design	

PROJECTS

Personal Developer Portfolio

- 2025 - 2025
- Personal Project
- Designed and built a personal portfolio site in React/Vite with Framer Motion animations, deployed via GitHub Pages

BMI Calculator App

- 2025 - 2025
- Personal Project
- Built a mobile BMI calculator app in Flutter, taking height and weight input to calculate and display BMI with category classification

PropMap AI – Property Management & Real Estate Application Flutter

- 08/2026 - 09/2026
- Developed a cross-platform property management application using Flutter and Dart, implementing authentication, property, profile, and home modules with Firebase integration. Structured the application using models, providers, services, screens, and reusable widgets.
- Successfully developed the core modules of the PropMap AI application using Flutter and Dart.
- Configured Firebase integration across Android, iOS, Web, macOS, and Windows.
- Built a scalable project structure using models, providers, services, screens, and reusable widgets.
- Created the foundation for future property listings, user management, and real-estate features.
